

ARC WELDING MACHINE

ARC250i MAX

This portable MMA/STICK welder provides the best welding experience for DIY population, more concentrated and more stable arc, providing professional ARC performance, and it can even be adjusted as needed to make the arc softer or harder.

FEATURES

- #. Adopting the mature IGBT inverter technology, strong power with stable performance.
- #.Using the Auto adaptive HOT start technology, ARC ignition successful rate can up to 99% and very easy to start for people who are new for welding.
- #.With adjustable ARC force function, it largely enlarge its operation site.
- #.DC current output, good fit for Acid electrode and Alkaline electrode,like E6010, E6011,E6013,etc,
- #.Tolerant to current fluctuation or arc length.

SPECIFICATION

| | |
|--------------------------|------------------|
| MODEL NAME | ARC235i MAX |
| INPUT VOLTAGE | 1P220V \pm 15% |
| FREQUENCY | 50/60Hz |
| RATED INPUT CURRENT | |
| OUTPUT CURRENT | 30-250A |
| ARC FORCE | 1-10 |
| DUTY CYCLE | 60% |
| EFFICIENCY | \geq 85% |
| INSULATION GRADE | F |
| HOUSING PROTECTION GRADE | IP21 |
| DIMENSION L x W x H | 355*130*220mm |
| WEIGHT APPROX. | 4.2kg |
